How to Search the Library Catalog

If you would just like to search the library catalog, select “Bethany College Wallerstedt Library”. Our catalog will not only search our in house library holdings, but also our electronic materials (ebrary, databases, etc.)
You can search the catalog by subject, title, author, or descriptor (ex. Pulitzer prize). Once you have completed your search, you have a variety of options on the left side to narrow down your search. If you find an item you would like that is in our library, click availability to see if the item is available and what the call number is.
